

## TDR inspires the BME community

TDR is committed to providing equal opportunities for all members of the local community. Over the summer holidays the First Apprenticeship in Science and Engineering programme was made available to the younger members of African Community Advice North East (ACANE).

Feedback from ACANE;

*“With TDR, we had six exciting sessions, all involving first children members of our community to have fun activities which we do not direct provide ourselves. Most importantly, these sessions have been useful to children who had no others activities to occupy themselves rather than the usually IT and computer games. Overall, the sessions were very good and were inspiring to both children and the organization. We would like to organise a similar kind of activities in the future. We have to thank both Jakarin and Mike for their enthusiasm, commitment and patience in working with our children. I think the pictures attached illustrate how successful the sessions were and also how much the children enjoyed it. I am looking forward to working with TDR in the future”*
